

# Bright ideas to save you money!

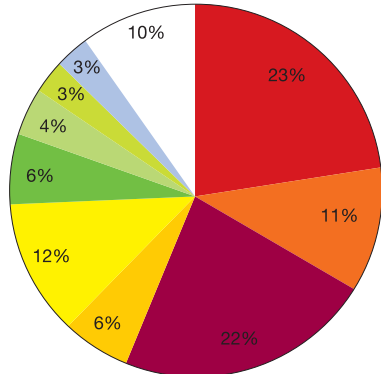

Energy saving light bulbs have always been a bright idea - for your pocket and the environment. They use up to 80% less electricity than a standard bulb, but produce the same amount of light. In other words, they can help you to save money and energy. By saving energy, you'll be helping to fight climate change too.

Technology has moved on a lot since energy saving light bulbs were first invented, and so has the way they look. In fact, whatever type of bulbs you use to light your home, there are sure to be stylish energy saving equivalents.

**So, why not switch to energy saving light bulbs today?**

Electricity usage in a typical household.

- Lights
- Cooker
- Fridge/Freezer
- Kettle
- TV
- Washing Machine
- Microwave
- Tumble Dryer
- Dishwasher
- Others

Lights use more electricity than anything else in a typical household.
